

Fazor 1000

Auto-darkening welding helmet

Welding helmets from Fronius are a byword for super-safe working and superb comfort and convenience for the wearer. As seen in features like auto-darkening, high-level heat and radiation shielding, constant UV / IR protection and optimum wearer comfort. The latest addition to the product line, the Fazor 1000 offers all this to discerning DIY-ers and responsible training establishments.

- permanent protection from UV / IR radiation
- continuous shade-level settings (9 to 13)
- dark-to-light delay
- sensitivity controller
- battery-change for LC display
- weight of helmet (complete) 495 g (1.09 lb)
- meets CE, DIN, ANSI, CSA, AS/NZSm, GOST-R Standards

ALL CLEAR FOR PERFECT WELDS

Auto-darkening

The helmet detects when you start welding and automatically darkens the filter. Giving you optimum visibility before, during and after welding.

High-level thermal and radiation shielding

The helmet's high-grade materials and special paintwork finish give users the very best protection against heat and reflected light.

Permanent protection from UV / IR radiation

A special filter integrated in the cartridge shields your eyes from harmful ultraviolet and infrared radiation, regardless of whether the cartridge has been activated or not.

Optimum wearer comfort

Thanks to its multi-adjustable headband, the Fronius Fazor 1000 always fits like a glove. Its weight is ideally distributed.

Automatic idle mode

In complete darkness, the LC display automatically cuts out after 10 minutes. This saves energy and prolongs its service life. As soon as light reappears, the display is automatically switched back on.
