

STARLET 2221

The Multi-Purpose Handle
for Professional Demands

Handle **STARLET 2221**

The new handle **STARLET 2221** is designed in robust compact construction incorporating the latest technical features necessary to meet the ever-changing applications and requirements of multi-purpose handles for welding, brazing, flame cutting and heating. Its ergonomic and modern functional design permits steady, effortless control by hand and its low and balanced weight enables the operator positive and comfortable working conditions for continuous operations.

The **STARLET 2221** is designed for general workshop welding **up to 14 mm / 1/2 inches** and cutting **up to 100 mm / 4 inches**

- Ergonomic and robust construction in black anodized massive aluminium provides greater efficiency and safer operating
- Left-side positioned gas valves for easy one-hand operation
- Valve-forward position ensures maximum operator safety
- Balanced weight distribution enables easy handling
- Self-tightening radial seals ensure leak-proof sealing and enable manual fixing of the connection nut
- Maintenance-free monoblock valves allow precise and sensitive adjusting as well as accurate control of the flame

Large cross-sectional area enables high gas flow rates, even on heavy duty applications with low gas pressures

- Suitability for use with all fuel gases
- Colour coding of the adjusting valves for easy gas identification
- Modular design reduces maintenance cost and downtime due to interchangeable monoblock valves, hose connectors and connection adapter
- Designed in accordance with the most current internationally recognized standards EN ISO, BSP, CGA, NFS, AS
- Manufactured under the quality management system of EN ISO 9001
- 100% tested before despatch
- Technical data:
Shaft diameter: 15 mm
Weight: approx. 470 g
Length: approx. 210 mm
